

SADAT
A.S.

TRAINING MODULES FOR LAND FORCES

Training Concepts and Activities of SADAT Defense

Depending on requests, SADAT Defense has ability to perform the basic and advanced trainings and orientation Programs effectively with the training teams composed from professionals chosen from a large circle of reserves at all fields of Armed Forces of Friendly Countries in their own territories.

SADAT Defense has an archive of documentations which includes of training plans, schedules, instructors books and trainees books to open and implement any courses for all branches and units for the armed forces of countries all around the world and updates and upgrades this archive in accordance with the new Technologies and developments and also keeps ready to anytime use by Professional Teams of SADAT Defense

Training Concepts and Activities of SADAT Defense

SADAT Defense's portfolio of trainers (instructors) is composed of young and experienced professionals who have special skills and capabilities on their subjects of expertise. Depending on the needs, SADAT Defense has possibility to expand the reserve of trainers as well.

SADAT Defense recognizes that possessing and holding of well-trained persons as reserves qualified enough to respond all faces of a war contributes to national defense as much as that possessing technological and physical defensive instruments at least and also minds and cares the importance of trainings and courses for individuals, small troops and special forces.

Training Concepts and Activities of SADAT Defense

The significant courses of SADAT Defense to improve individual skills are;

1. General Training Programs

- a. Individual Combat Training and Small Unit Tactics
- b. Special Forces Basic Course
- c. Special Forces Advanced Course
- d. Aviator/Aviation Courses

2. Module Training Programs

a. Training Modules for Land Forces

1. Land Operations Training Program
2. Sniper/Sharpshooter Training Program
3. Special Task Shooter Training Program
4. Protection Training Program
5. Advanced Demolition Training Program
6. Unconventional Warfare Training Program
7. Urban Warfare Operation Training Program
8. Individual Combat Training and Close Quarter Battle Course
9. Artillery Forward Observer Training Courses
10. Armoured Vehicle Destruction and Hunting Training Program

b. Training Modules for Navy Forces

1. Sea Operations Training Program
2. Frogman Basic Training Program

c. Training Modules for Air Forces

1. Air Operations Training Program
2. Helicopter Pilots Training Program

d. Training Modules for Interior Security

1. Border Security Stations Training Program
2. Basic Police Special Operation Training Program
3. Urban Warfare Operation Training Program

Land Operation Training Programs

Initial Requirements for Courses

Candidates must have successfully completed some major trainings before and gained the skills listed below;

1. Knowledge of Basic Military Rules and Techniques
2. 7200 meters run with 20 kg backpack in 52 minutes or less
3. %60 + achievement on rifle and pistol shootings

Candidates showing success during tests of above requirements are accepted into the land operations training Programs.

Land Operation Training Programs

Training Subjects

During the Land Operations courses, all of the drills taught to trainees are practiced in terrain by professional trainers with the special equipment supplied for every individual trainee. The main subjects taught to trainees are as below;

1. Physical Fitness and Toughness Training
2. First Aid
3. Shooting Drills
4. Marching Formations and Patrolling
5. Ambush
6. Reconnaissance and Intelligence
7. Evasion and Survival
8. Close Quarter Combats
9. Search and Rescue
10. Refugee Evacuations
11. Raid and Sabotage
12. Aircraft and Helicopter Directing

Skills to Be Gained at The End of The Course

At the end of the Courses, trainees showing the qualifications of;

1. Orientation to assignments in all units from smallest to highest in army organizations
2. Ability to apply First Aid Procedures
3. Knowledge of firearms and highest performance at using arms effectively
4. Applications of team marching formations in terrain
5. Knowledge and application of ambush types against troops, convoys and regions
6. Ability to escape alone from enemy field and survive
7. Ability to search, save and rescue from enemy or friendly areas of combat
8. Knowledge and applications of sabotage techniques
9. Ability to infiltrate into the enemy lines and direct the attack helicopters, aircrafts, bombers or other subjects of friendly forces to help assaults
10. Ability to identify communication means in combat and operate effectively

Land Operation Training Programs

11. Ability to capture, hunt or destruct the strategic objects of enemy such as tanks, aircrafts etc

are awarded with “Certificate of Land Operations Expert” ...

Duration of Course:

Trainings including theoretical trainings, practices and simulations last 16 weeks in total

Sniper / Sharpshooter Training Programs

Initial Requirements for Courses

Candidates must have successfully completed some major trainings before and gained the skills listed below;

1. Knowledge of Basic Military Rules and Techniques
2. 7200 meters run with 20 kg backpack in 52 minutes or less
3. %60 + achievement on rifle and pistol shootings

Candidates showing success during tests of above requirements are accepted into the sniper / sharpshooter training Programs.

Sniper / Sharpshooter Training Programs

Training Subjects

During the Sniper / Sharpshooter Training Courses, all of the drills, taught to trainees, are practiced in terrain by professional trainers with the special equipment supplied for every individual trainee and instruments such as helicopters, boats, electronic simulation systems and first aid simulation systems are used. The main subjects taught to trainees are as below;

1. Physical Fitness and Toughness Training
2. Basic Shooting Techniques
3. Advanced Shooting Techniques
4. Reconnaissance and Intelligence
5. Communications
6. Evasion and Survival

Sniper / Sharpshooter Training Programs

Skills to Be Gained at The End of The Courses

At the end of the course, candidates showing the qualifications of;

1. Knowing their weapons in depth and shooting with the highest accuracy,
2. Knowing the sniper rifles used in the armies of other countries,
3. Knowing and implementing the first aid practices,
4. Surviving during and after the missions in the enemy zone under challenging conditions,

The trainees successfully passing the tests and evaluations to be held at the end of the training, are awarded with a Sniper certificate, stating the completion of course his success status.

Duration of Course

Trainings including theoretical trainings, practices and simulations last 8 weeks in total

Special Task Shooter (Top Level Sniper)

As an element of today's Asymmetrical War, it is possible to cause a massive impact on the enemy by using the dual Sniper teams. Within the scope of intense struggle between Turkish Armed Forces and terrorist organizations, using the sniper teams proves the significance of its power.

The personnel with the ability to shoot accurately and effectively are categorized under three groups:

- a. **Shooter:** This is the person who has the ability to shoot with high accuracy in every kind of environment, without using any additional tool, by combining the structural characteristics of the weapon, shooting techniques and principles with personal abilities.
- b. **Sharp-Shooter:** This is the person having the talent and ability to make accurate shoots in a distance about 600 meters with a special rifle equipped with optical tools (weapon sight, wind gauge, etc.)
- c. **Special Task Shooter – Special Sniper:** The person with the talent and ability to have very high accuracy in shooting (99%) by using all

Special Task Shooter (Top Level Sniper)

the camouflage techniques, within the enemy perimeter when required, under any weather conditions, with a custom rifle, having the ability to make accurate shoots in a distance of 600 meters and more, equipped with weapon sights and shooting computers with more advanced features. They carry out missions as a dual team with a sniper assistant.

The Special Task Shooter (Special Sniper) is a professional shooting expert having the required technical background, physical endurance and a strong psychology. The Special Task Shooter (Special Sniper) has the ability to make successful shoots based on the distance, scale, location, temporary nature conditions on targets which cannot be stricken by the sharp shooter.

The faction with a Sniper achieves potential superiority on the enemy with a “force multiplier” factor, which has the ability to seal the fate of war. He has to have all the abilities to survive for a long time while engaging in the combat zone and behind the contact line, as well as having the ability

Special Task Shooter (Top Level Sniper)

to implement all concealment and camouflage techniques. The sniper assistant is trained under the same conditions.

The trainings of a sniper must be repeated until the foregoing abilities are intensified and the required experience is gained; both the psychological and physical abilities are to be maintained always on a maximized level.

SNIPER TRAINING

Where the candidate trainees and personnel, elected among the gunners and sharp shooters, show success in the tests and evaluation processes, they are accepted to the Sniper Training.

Qualification Criteria for Attending the Course

- a. Knowing the general military rules and techniques,
- b. Completing the track of 7200 meters under 52 minutes, with a 20-kg rucksack
- c. Having 80% accuracy rate in the pistol and infantry rifle shoots (Having the accuracy of a sharp shooter)

Special Task Shooter (Top Level Sniper)

Training Subjects

Sniper Training is provided by professional trainers with custom equipment and entrenching tools assigned specific to each trainee in the field, after providing the basic information in line with the simulated military operations carried out within the framework of the completed training program, in order to get the trainees experienced and able.

- a. Combat physical education and condition
- b. Basic shooting techniques
- c. Advanced shooting techniques
- d. Special reconnaissance & intelligence
- e. Correspondence
- f. Concealment and camouflage

Special Task Shooter (Top Level Sniper)

- g. Survival
- h. Evasion and Escape

Abilities to Be Gained After the Training

The following skills of the trainees are improved by using various weapons, helicopter, boat, electronic simulation kit, first aid simulation kit, etc. during the Sniper Trainings:

- a. Knowing their weapons in depth and shooting with the highest accuracy,
- b. Knowing the sniper rifles used in the armies of other countries,

Special Task Shooter (Top Level Sniper)

- c. Knowing and implementing the first aid practices,
- d. Surviving during and after the missions in the enemy zone under challenging conditions,
- e. Making direct-hit shoots by choosing the target from long distances (up to 1800 meters with the respective weapon and additional technical equipment),

The foregoing abilities and skills of the trainee are improved. The trainees successfully passing the tests and evaluations to be held at the end of the training, are awarded with a Sniper certificate, stating the completion of course his success status.

Training Period

Sniper trainings comprise of a 12-week program, as theoretical training, simulation trainings and shooting tasks.

Initial Requirements for Courses:

Candidates must have successfully completed some major trainings before and gained the skills listed below;

1. Knowledge of Basic Military Rules and Techniques
2. 7200 meters run with 20 kg backpack in 52 minutes or less
3. %60 + achievement on rifle and pistol shootings
4. 150 Meters FreeStyle Swim in 6 minutes or less

Candidates showing success during tests of above requirements are accepted into the Protection Course Training Programs.

Security Courses Training Program

Training Subjects

With the usage of instruments such as various arms / weapons, boats, electronic simulation systems and first aid simulation systems, Protection Course Training Program includes

1. Physical Fitness and Toughness Training
2. First Aid
3. VIP Protection
4. Vehicle Protection

Security Courses Training Program

Skills to Be Gained at The End of The Course

At the end of the course, candidates showing the qualifications of;

1. Basic Protection Techniques
2. Person, Building, Vehicle and Region Protection Techniques
3. First Aid Techniques
4. Assassination Techniques

are awarded with the “Certificate of Protections Expert” ...

Duration of Course

Trainings including theoretical trainings, practices and simulations last 4 weeks in total

Initial Requirements for Courses

Candidates must have successfully completed some major trainings before and gained the skills listed below:

1. Knowledge of Basic Military Rules and Techniques
2. 7200 meters run with 20 kg backpack in 52 minutes or less
3. %60 + achievement on rifle and pistol shootings
4. 150 Meters FreeStyle Swim in 6 minutes or less

Candidates showing success during tests of above requirements are accepted into the Advanced Demolition Training Programs.

Advanced Demolition Training Program

Training Subjects

During the Course Program, trainings are practiced in different types of terrains such as forests, rocky areas or mountainous regions by professionals and course program includes:

1. Advanced Demolition Techniques,
2. Handmade Explosives
3. Vehicle Destruction
4. Building Destruction
5. Mines
6. Bomb Disposal
7. Underwater Demolitions

Skills to Be Gained at The End of The Courses

At the end of the course, candidates showing the qualifications of:

1. Basic Demolition Techniques
2. Advanced Demolition Techniques
3. First Aid Techniques
4. Vehicle and Building Destruction
5. Bomb Disposal Techniques
6. Bomb Making Skills

are awarded with the “Certificate of Demolitions Expert”.

Duration of Course

Trainings including theoretical trainings, practices and simulations last 8 weeks in total

Unconventional Warfare Training Program

SADAT Defense provides trainings of ambush, raid, road cutting / closing, destruction, sabotage, Rescue / Abduction Operations and “Counter Tactics and Techniques” to above for Unconventional Warfare Organizations and related components for the Need of National Defense Preparations of a country.

Initial Requirements for Courses:

Candidates must have successfully completed some major trainings before and gained the skills listed below:

1. Knowledge of Basic Military Rules and Techniques
2. 7200 meters run with 20 kg backpack in 52 minutes or less
3. %60 + achievement on rifle and pistol shootings
4. 150 Meters FreeStyle Swim in 6 minutes or less

Candidates showing success during tests of above requirements are accepted into the Unconventional Warfare Training Programs.

Unconventional Warfare Training Program

Training Subjects:

With the usage of instruments such as various arms / weapons, boats, electronic simulation systems, first aid simulation systems sea mines, Unconventional Warfare Training Program includes

1. Organizing National Unconventional Warfare (UW) Components
2. Intelligence
3. Resistance and Insurgency
4. Guerilla Operations
5. Rescue and Evasion Operations
6. Special Forces Operations
7. Insidious Waterborne Operations
8. Airborne Operations
9. Psychological Warfare
10. Communications and Communications Safety Procedures
11. Logistics
12. Counter UW Operations
13. Leadership in UW
14. First Aid in UW

Skills to Be Gained at The End of The Course:

At the end of the course, candidates showing qualifications to;

1. Sabotage
2. Raid
3. Ambush
4. Demolish
5. Assassinate
6. Rescue and Evade
7. Insurgent
8. Abduct

are awarded with “Certificate of Unconventional Warfare Course Completion”

Duration of Course:

Trainings including theoretical trainings, practices and simulations last 16 weeks in total

Unconventional Warfare Training Program

Course Initial Proficiency Criteria

To be able to follow the course, the trainees must have passed some training sessions and gained specific skills as a result of these trainings. These as a minimum;

1. Knowing basic military service rules and techniques,
2. Completing the 7200 meters distance with a 20kg backpack in under 52 minutes,
3. Providing 60% success with pistol and infantry rifle shooting.

Trainees who successfully passed the test and evaluations that will be done, are accepted in Urban Warfare Operations Training.

Training Topics

In the Urban Warfare Operations course; after providing basic information, in the land environment, allocated map with handhold binoculars and fortifications, assigned by trained trainers for each trainee, training is given in the following main topics by making them talented in request and adjustment of fire, in drones and simulation devices.

1. Leadership training,
2. Convergent system training,
3. Communication in the populated Locale,
4. Reading Map/Sketch,
5. Drone Usage,
6. Photo and video evaluation techniques,
7. Distance estimation, target detection and description methods,
8. Camouflage and concealment,
9. Destruction,
10. Trapping and avoiding traps methods,
11. Team operations in the populated locale and building,
12. First aid

Capabilities to be earned at the End of the Course

At the end of the Urban Warfare Operations Training, the trainees are gained the following ability and capability.

1. Operating techniques in the Populated Locale,
2. Target identification and evaluation from the photo and video,
3. Trapping the Building and techniques to escape from the trapped region,
4. Support routing of helicopter and mortar,

Those who successfully passed the test and evaluations that will be done, are given a Certificate of Populated Locale Operations Training.

Course Duration

The Urban Warfare Operations Course training consists of a total of 45 days program in theoretical, practical, and simulation training.

Initial Requirements for Courses

Candidates must have successfully completed some major trainings before and gained the skills listed below;

1. Knowledge of Basic Military Rules and Techniques
2. 7200 meters run with 20 kg backpack in 52 minutes or less
3. %60 + achievement on rifle and pistol shootings

Candidates showing success during tests of above requirements are accepted into the Advanced Individual Combat Training Programs.

Training Subjects

During the Advanced Individual Combat Trainings, all of the drills taught to trainees are practiced in terrain by professional trainers with the special equipment supplied for every individual trainee. The main subjects taught to trainees are as below;

1. Close-Order Drill
2. Weapons Mechanics Course and Shooting Training
3. Intelligence
4. Protection from direct or indirect enemy fires
5. Survival –Evasion, Recovery Techniques (Basic)
6. Assault tactics and techniques under enemy fire
7. Judging Distance
8. Land Navigation, Map Survey, Target Identification Procedures, Navigation with Compass

Skills to Be Gained at The End of The Course

At the end of the course, candidates showing qualifications of;

1. Put the map in direction and ready symbols
2. Quick Introduction of a Target in terrain
3. Course of Action in Engagements
4. Survival Procedures

are awarded with the “Certificate of Individual Combat Expert” ...

Duration of Course

Trainings including theoretical trainings, practices and simulations last 4 weeks in total

Initial Requirements for Courses

In order to be accepted the Artillery Forward Observer Courses, Candidates must have successfully completed the;

1. Physical Fitness and Battle Drill Trainings
2. Individual Combat Trainings
3. Course of Communications Skills with Military Communication Devices

Training Subjects

During the Artillery Forward Observer Trainings, Fire Request and Correction Skills taught to trainees are practiced in terrain by professional trainers with the instruments such as maps, binoculars and military folding shovels supplied for every individual trainee. The main subjects taught to trainees are as below;

1. Map Study and Map Reading
2. Binoculars
3. Judging Distance, Target Identification and Introduction
4. Camouflage and Concealment
5. Fire Request and Directing Procedures and Techniques
6. Components of Fire Requests

Skills to Be Gained at The End of The Course

At the end of the course, candidates showing qualifications of;

1. Put the map in direction and ready symbols
2. Quick Introduction of a Target in terrain
3. Terrain Validation skills, Preparing Hasty Sites for Observation, Application of Camouflage and Concealment Techniques
4. Fire Request and Directing Procedures in Time Standard

are awarded with "Certificate of Artillery Forward Observer" ...

Duration of Course

Trainings including theoretical trainings, practices and simulations last 2 days in total

Initial Requirements for Courses

In order to be accepted the Armored Vehicle Destruction and Hunting Courses, Candidates must have successfully completed the;

1. Physical Fitness and Battle Drill Trainings
2. Individual Combat Trainings
3. Small Unit Tactics and Techniques Trainings
4. Antitank and Infantry Weapons Trainings
5. Tank Crew Trainings

Training Subjects

The Aim of the Course is to encourage candidates to orientate armored vehicles, especially the tanks by teaching them how to use antitank

Tank / Armored Vehicle Hunting Training Program

weapons like rifle-grenades, Rocket Launchers, Light Antitank Weapons (LAW), Rocket Propelled Grenades (RPG-7 etc), Flame Guns, Smoke Guns, Chemical Weapons, Handmade Destructive Materials, Smoke Cans, Molotov Cocktails and other obstacles to hunt or how to capture them. The main subjects of these trainings are as below;

1. Knowledge of enemy armoured vehicles and their weak points
2. Separating Infantry from Tanks and forcing tank crew to lock covers
3. How to get in / off Tanks
4. Trench construction
5. How to use Anti tank weapons
6. How to use Flame Guns
7. How to use explosives against tanks
8. How to construct obstacles against tanks
9. Defensive Operations in Urban areas
10. How to capture a tank

Skills to Be Gained at The End of The Course

At the end of the course, candidates showing qualifications of;

1. Ambushing Tanks and Capturing
 2. Stopping Tanks and Destructing
 3. Burning a Tank to Destruct
 4. Tactics and Techniques to separate infantry from tanks
 5. Techniques to enforce enemy tanks crew to stay in tank and lock
- are awarded with the “Certificate of Armoured Vehicles Destruction and Hunting Course”

Duration of Course

Trainings including theoretical trainings, practices and simulations last 3 days in total
