Armory Solutions

Training Simulation Concepts

Shooting Range Solutions

# Military Logistics Systems

Our Products

- Military Logistics Systems designed by **SADAT Defense** are a work aimed at increasing the success of training, military exercises or operations and seriously contributing to the success of possible operations, the need for rapid action and mobilization, also used by advanced armed forces.
- The main objective is to meet the need for transferring the elements fighting to the training, military exercise or operation area from where the barracks are located, as well as the logistics needs at the same speed.

# Military Logistics Systems

Our Products

## ARMORY SOLUTIONS

- This new concept, designed and implemented by SADAT Defense, makes a significant contribution to the "Mobilization" requirement of all modern armies.
- Mobile, portable and fixed modular armory designs both increase the mission success of the country's Armed Forces and remove a significant deficiency even if it has low cost.

# Military Logistics Systems

Our Products

## TRAINING SIMULATION CONCEPTS

- Advanced armies use training simulators in almost every branch. These simulators increase the quality of training and significantly reduce training costs.
- Mobile simulation systems developed by **SADAT Defense** are designed to easily deliver expert simulation systems to places where training is needed.

# Military Logistics Systems

Our Products

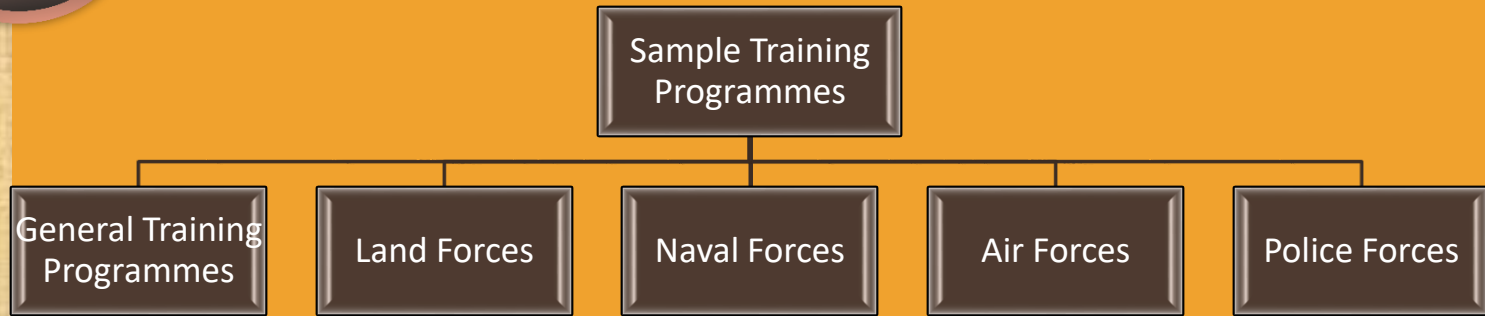

## SHOOTING RANGE SOLUTIONS

- The “Shooting Range Systems” designed by **SADAT Defense** are the areas where real shots can be made, pistols, rifles and even sniper rifles can be fired.

Systems are evaluated in 3 categories according to their usage;

- Mobile shooting range systems
- Portable shooting range systems
- Fixed modular shooting range systems
